

Comments Regarding Abstract of the Disclosure

In accordance with the requirement set forth on page 3 of the Final Office Action, a clean copy of the ABSTRACT OF THE DISCLOSURE incorporating the amendments specified on page 5 of Applicant's previously filed Response is provided on the next page.

ABSTRACT OF THE DISCLOSURE

A clinical laboratory management system is described that includes an analyzer for analyzing a sample, and a management apparatus connected to the analyzer. The management apparatus includes (a) a storage configured for storing a result of an assay output from the analyzer, analyzer identification information for identifying whether or not the analyzer used for the assay has a dilution mode, and diluted sample identification information for identifying whether or not the sample used in the assay is a diluted sample; and (b) a controller configured for correcting the result when the analyzer used in the assay does not have a dilution mode, and the sample used in the assay is a diluted sample. Management apparatuses and recording media are also described.
